

4.5 Command line arguments for cwsetup

Command-line arguments for cwsetup

- `/?`
Show possible options
- `/silent`
The installer window is not displayed. Everything happens in the background.
- `/offline`
Forces installation from the Update folder (no online verification or download).
- `updateexe=<Directory-EXE>`
Version(s) to be updated. Versions are separated by `|`.
Example ``EXE_30|EXE_29`` will update versions 30 and 29.
- `/unattended`
Enables unattended installation without `unattended.ini`, see necessary arguments below:
 - `eula=accept`
Accept end-user license agreement
 - `clientnumber=<Number>`
Below client number examples to be adapted to match your own.
No. format for a client/company = 04.1234.0
No. format for a school = 04.S123.0
No. format for a professor = 04.P.12345
No. format for a student = 04.D.12345 or 04.E.12345
 - `language=<Language>`
Language of installation and consequently of catalogs and template files. Possible languages are :
GERMAN, ENGLISH, FRENCH, SPANISH, ITALIAN, CZECH, POLISH, ROMANIAN, RUSSIAN, DUTCH
 - `targetpath=<UNC_Path>`
Program folder path.
Example: `targetpath="C:\Program Files\cadwork.dir"`
 - `updatepath=<UNC_Path>`
Path to update download folder.
Example: `updatepath="C:\Users\Public\Documents\cadwork\update"`
 - `catalogpath=<UNC_Path>`
Path to user-specific catalog folder.
Example:
`catalogpath="C:\Users\Public\Documents\cadwork\cadwork.cat"`
 - `catalogs=<ALL|NONE>`
Installing catalogs and userprofiles
ALL = install all
NONE = install nothing
 - `userprofilpath=<UNC_Path>`
Path to userprofil folder (template files etc.)
Example:
`userprofilpath="C:\Users\Public\Documents\cadwork\userprofil_30"`
 - `Wood=TRUE`
TRUE = Wood construction
FALSE = Engineer / Civil (Switzerland only)
- `/update`
Goes directly to the update without leaving the choice of version.

- /settings
Opens the settings.
- /uninstall
Starts the uninstall
- /removeobsolete=FALSE
False = Older versions are retained (default) True = Latest version and previous version remain. All other versions are deleted.
Example of installing version 30 SP2024 with cwsetup.exe V30 SP2024 :
V30 SP2024 and V29 remain.
V28 and earlier versions are uninstalled.

Here are two examples:

- cwsetup.exe /silent /unattended clientnumber=04.1234.0 language=FRENCH
Starts *unattended, background* installation with client number *04.1234.0* and in *French*.
- cwsetup.exe /silent /update
Starts the update in the background
