

## 6.4 Assemblies

The `IfcElementAssembly` represents complex element assemblies that are made up of several elements. Timber or steel construction assemblies, such as trusses and various types of frames, can be represented by the `IfcElementAssembly` entity. Stair sections and other prefabricated elements like steel brackets are also examples of the general entity `IfcElementAssembly`.

- `IfcElementAssembly`
  - `IfcPlate`
  - `IfcMember`
  - `IfcMechanicalFastener`
