

2.9 Scene bar

The scene bar is located at the bottom left.

To create a scene, click on the "scene" button.

There are several types of scenes:

- 3D, Top, V and P scenes
- Scenes linked to a cut
- Scenes linked to an elevation
- Scenes linked to a 2d plan

The differentiation of the different types of scenes is done by the color of the name and sometimes by a specific symbol.

Different options exist for the scenes. To open them right click R on the name of the scene.
