

2.10 Comment bar

The bottom comment line shows the functions that can be executed when an element is activated.

This line can vary depending on the type of active element. In green are indicated the keyboard shortcuts that can be used. It is possible to use several shortcuts in a row.

Example of a comment line for a wall:

3 rotate 90 (Z axis) 4 rotate + mirror 5 move 6 copy 7 stretch W wireframe ctrl + A activate by attribute

By pressing key **6** for the paste function, a new comment line opens:

Copy (L) point / M X Y Z D Distance V Vector H Horizontal 3 Rotate 90 R Rot Z F floor
